November 16, 2018

Dear Jeremy Harris,

Bayou Des Cannes Water System has been in operation since 1992. We have approximately 1,400 service taps. The entire distribution system consists of PVC (polymerized vinyl chloride) piping, PE (polyethylene) tubing, and ductile iron fittings - none of which contain lead or copper.

Bayou Des Cannes Water System has a corrosion control program in place which consists of injecting zinc orthophosphate at a controlled and constant residual to protect our customers, who own homes with copper tubing and/or lead-based solder, on their side of the meter.

Thank you,

Paul LaCombe  
BDCWS Manager  
Cell Phone: (337) 207-2805
