Regarding: Customers of Bayou Des Cannes Water System

Subject: Information regarding our water lines and the possibility of them containing lead:

Dear Customers of Bayou Des Cannes Water System:

Water Systems in Louisiana were required to submit a detailed inventory of all service lines pertaining to each individual water company to LDH. The information in question with each water company is regarding lead in their service lines. Here, at Bayou Des Cannes Water System, we submitted our inventory of each and every one of our service lines-both active and inactive to LDH informing them that we have no service lines that contain lead. In 1988 the Safe Drinking Water Act (SDWA) lead ban took effect. This states that water companies were banned from using lead pipe in their service lines from thereafter. Being that our water company was established in 1992-we do not have any service lines made from lead, galvanized requiring replacement, or any unknown material lines. This letter is just to inform our customers of this pertinent information. If you should have any questions regarding this matter, please feel free to contact our office at the phone number listed above.
